Learning lessons about EBM in
Tasman and Golden Bays

Why Tasman and Golden Bays?

- Once upon a time.....
 - Stakeholder workshops, aims, aspirations 2012
 - Reviews of available information 2013-15
 - Model building
- Also
 - Strong communities
 - Multiple businesses
 - Marine based
 - Land based

Biomass

- May

Two important lessons

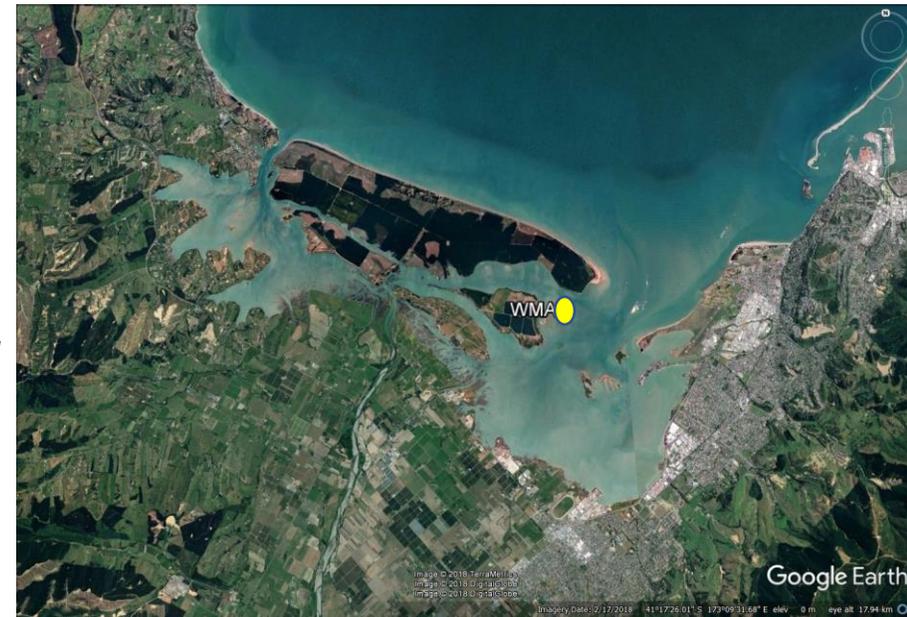

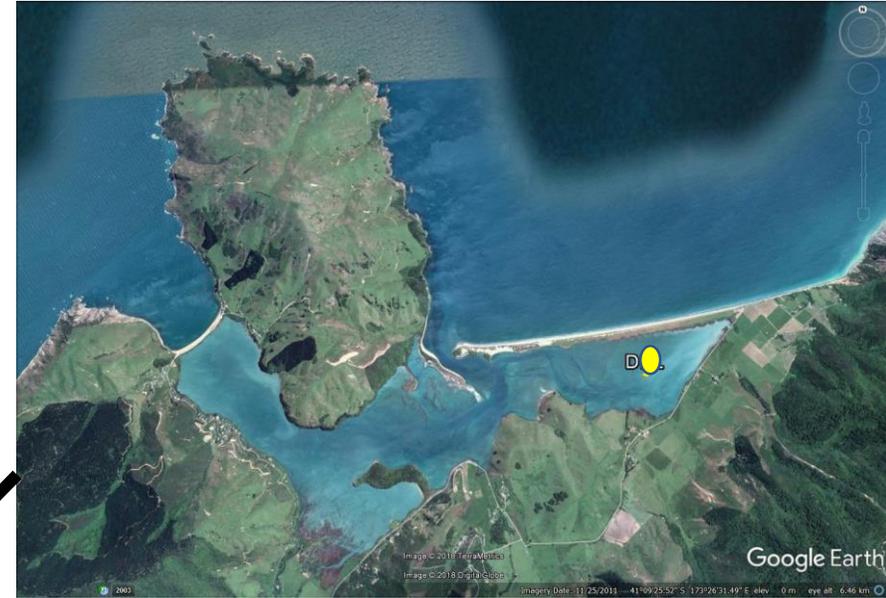

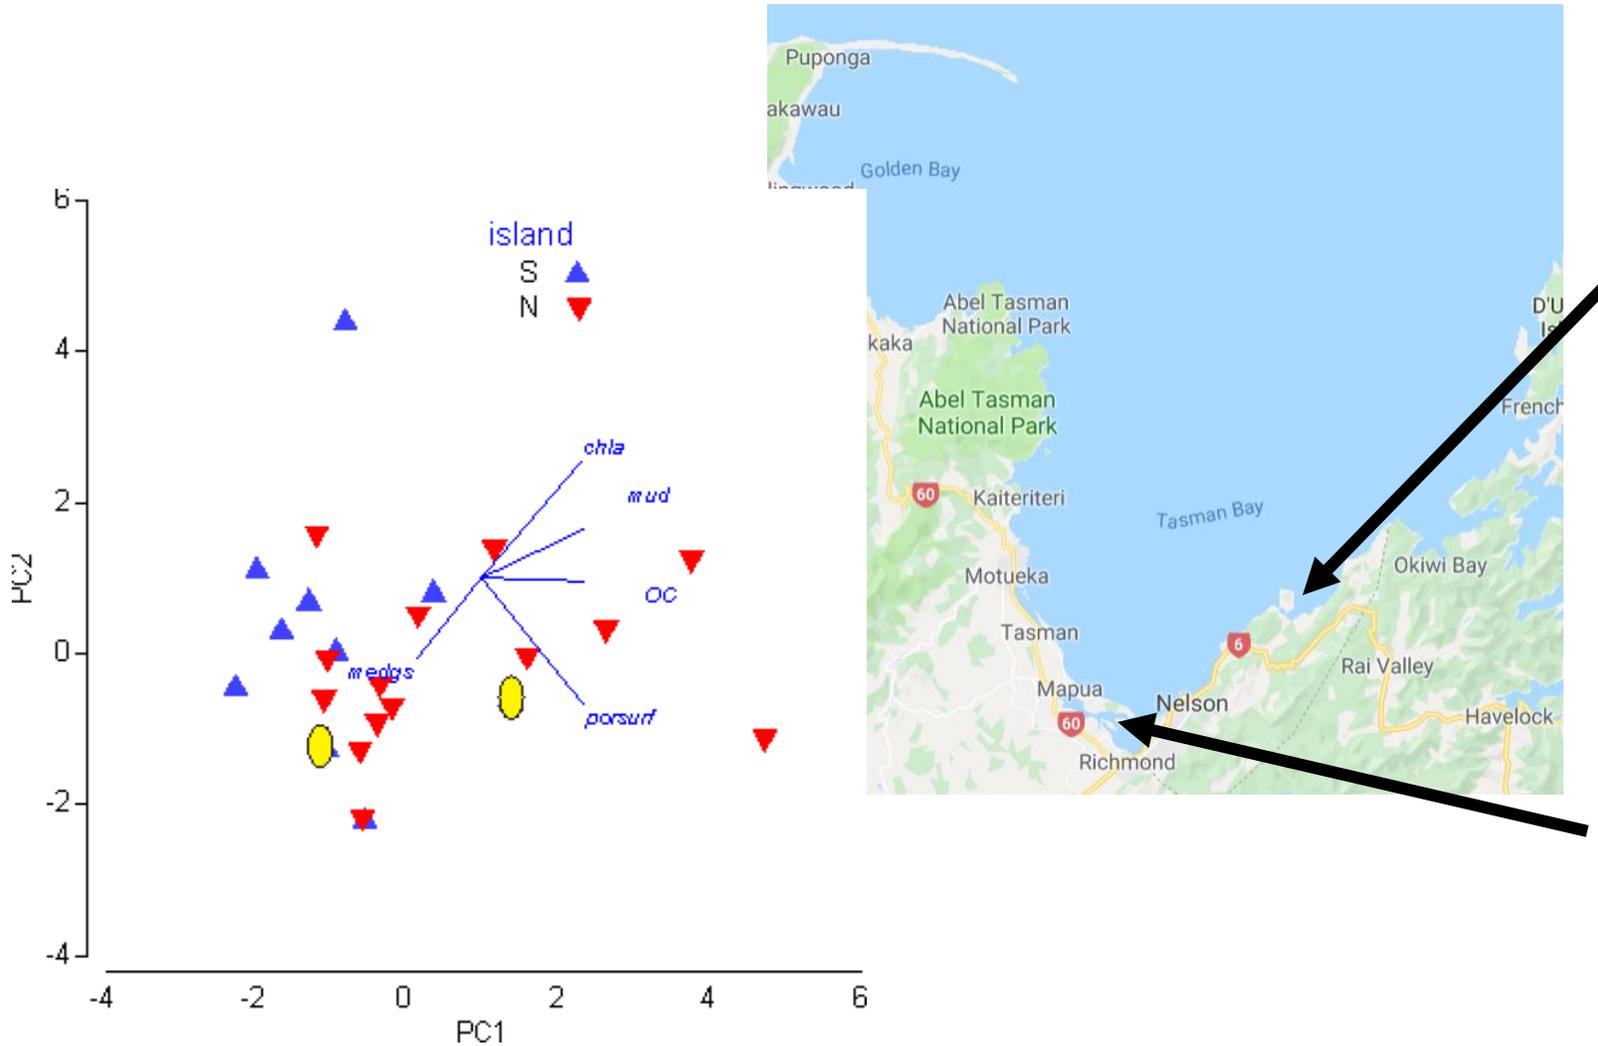

- Engagement break between 2016 and 2017
 - Hard to pick up momentum again
- Prior engagement focused on scallops and stakeholders interest around that
 - Hard to bring in new people not involved in setting previous goals and aspirations

Moving forward

We

- Have collated and collected a variety of information from the area
- Have developed a series of models that can be used to run management scenarios
 - Workshops testing the models with iwi and stakeholders in December
- Are running a pilot of using systems mapping for EBM
 - November to december
- Are developing Seasketch for the area
 - About to begin consultation about potential users

Comparing case study estuaries with other NZ estuaries
