Restorative economies

Blue economy

Social, environmental,
cultural and economic wellbeing

Ecosystem services/ Nature's contributions to people

Facilitating 'Management for recovery' small-scale community actions

Initiating actions to restore degraded systems can be difficult because of the complexity of nature-people links and the complexity of institutional and administrative setting.

Linking nature and people

This project aims to integrate knowledge flows between ecology, economy, policy and Mātauranga Māori generated by the Sustainable Seas Challenge...

Institutional roadmap

...and create institutional and stakeholder network that will enable navigating through bureaucratic structures.

Enhancing New Zealand blue economy

Linking nature and people supported by an institutional map will provide information baseline and guideline for investors willing to engage in restorative actions. Growing restorative economy sector will contribute to transitioning New Zealand marine economy to blue economy.
